Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 07 November 2005.
 2a) This action is FINAL. 2b) This action is non-final.

DETAILED ACTION

1. This Office Action is in response to applicant's amendment filed on November 7, 2005.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 9-11 are rejected** under 35 U.S.C. 102(b) as being anticipated by US Pat No 818,303 to Seaman.

Regarding claim 9, Seaman discloses a latch comprising a housing (1), a lever handle (15) mounted on the housing and being rotatable by an operator between a first position and a second position, and a pawl (6) mounted for substantially linear motion, and being actuated by rotation of the lever handle and traveling substantially linearly between an open position to a closed position as the lever handle is rotated between the first position to second position.

The pawl is mounted to travel between the open position along a first path and an intermediate position mounted to travel in a second path in an upward direction substantially perpendicular to the first path between the intermediate position and the closed position (see attachment #1).

As to claims 10 and 11, Seaman illustrates that the first and the second path are linear.

Allowable Subject Matter

4. **Claim 12 is objected** to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. **Claim 13** would also be allowed because the claim depends from claim 12.

Response to Arguments

5. After further search and consideration, the examiner makes a new ground(s) of rejection in view of Seaman.

As stated above, Seaman discloses a latch comprising a housing (1), a lever handle (15) mounted on the housing and being rotatable by an operator between a first position and a second position, and a pawl (6) mounted for substantially linear motion, and being actuated by rotation of the lever handle and traveling substantially linearly between an open position to a closed position as the lever handle is rotated between the first position to second position.

The pawl is mounted to travel between the open position along a first path and an intermediate position mounted to travel in a second path in an upward direction substantially perpendicular to the first path between the intermediate position and the closed position (see attachment #1).

In case that the applicant argues that Seaman fails to disclose that the pawl moves in a linear motion, the applicant is reminded that the claim language requires that the motion is "substantially" linearly motion. Substantially linearly motion means

that the motion is almost, approximately, or close to linear. At the instant, Seaman discloses that the pawl motion is almost, approximately, or close to linear.

As to claim 12, Seaman fails to disclose a carrier wherein the pawl is mounted. Therefore, claim 12 presents allowable subject matter over the prior art of record.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Lugo whose telephone number 571-272-7058. The examiner can normally be reached on 9-6pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner can be reached on 571-272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-272-7049.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-5771.
